The Outcomes committee had a conversation about looking at the data, its connection to interventions and how to ensure the committee is updated on these two. Kim Borchert, "How do we strike the balance between not creating work for the school team, but giving the board visibility into how all of these levels tie together." Dave Wolff and others discuss root cause analyses performed by the school-based team and how to share with the Board.

The committee looked at spring SAT data and shared feedback on the slide deck (future decks should include comparison data, overarching goal, executive summary.)

The committee looked at a sample scope and sequence calendar for SY25 and provided feedback. Vanessa Lipschitz, "I would really push us to think about where we have one page dashboards where we can see changes in all of the data allowing us to preserve our time for these deep dives." The committee discussed integrating Open Architects and spending time on training on this new platform.

Rob Rametti, "So I am hearing we [the committee will] have constantly running data that we will all monitor, then deep dive data, and another set of episodic data."

The committee also asked for more explanation of our three priority areas: Literacy Matters, All Means All, Data Driven which will we explain in the fall of 2024 when we adjourn again.

Adjournment:

- a) Meeting was adjourned at 12:02PM by Sarah James.
